

911 Service

There are differences between the 911 service dialled from your new Digital Home Phone service and the 911 service associated with traditional telephone service. You must inform all users and potential users of the nature and limitations of the provided 911 service.

Emergency Services

When you dial 911 from your Digital Home Phone service, your call will be answered by our emergency service operator. Our operator will verify that you are still located at the address you have registered with Distributel. If you are still at this location, our operator will transfer your call to the appropriate emergency agency. If you have moved your Digital Home Phone service equipment, you will need to provide our operator with your current location. They will determine the appropriate emergency agency, and then transfer your call accordingly. If you will be away from the service location you registered with Distributel for an extended period of time and will be taking your Digital Home Phone service with you, you must update your 911 address with Distributel to ensure that the appropriate address is on file in the event of a 911 emergency call.

This process can take up to 5 business days. Contact one of our customer service representatives to make changes to your 911 profile.

Important note

There may be an additional delay to transfer your emergency service call to areas not served by the 911 service associated with traditional telephone service.

When you are outside of Canada or the United States

If you dial 911 when you are outside of Canada or the United States, our emergency service operator will advise you to hang up and find a local phone and dial the appropriate emergency number (it may not be 911).

Warning

Power disruptions or failures, Internet Service Provider (ISP) outages or unavailability and tampering with equipment will also prevent dialling to emergency service numbers including 911. The customer acknowledges and understands that Distributel cannot be held liable for service outages beyond its reasonable control. Please read the Terms & Conditions at www.distributel.ca for full details.

High Speed DSL Internet with Yak Digital Home Phone Setup Guide

Contact us

**We are here to help,
feel free to contact us
with questions or to
provide feedback.**

For additional information, please visit the FAQ section of our website at www.distributel.ca. To provide feedback, please submit a customer review via our website or our Facebook page. Thank You for choosing Distributel

In order to ensure the smooth setup of your Distributel High Speed DSL Internet service, please follow the easy steps laid out in this guide.

The setup kit for your High Speed DSL service with Yak Digital Home Phone should contain the following items:

Analog Telephone Adapter (ATA) & power supply

Phone Cable (1)
Ethernet Cable (2)

Yak Digital Home Phone Setup Guide

*Please note that the modem shown is for the purposes of illustrating the setup process and may differ from your device.

Before beginning the setup process, please ensure that all of your equipment is turned off.

STEP 1 Using the phone cable provided in your installation kit, connect the grey DSL port located on the back of the modem to your phone jack.

STEP 2 Connect your telephone to the PHONE 1 port located on the back of the Analog Telephone Adapter (ATA). If you have ordered a second Distributel phone line, it will be provisioned on the "PHONE 2" port of the (ATA).

STEP 3 Using one of the Ethernet cables provided, connect one of the available modem LAN ports to the blue INTERNET port of the Analog Telephone Adapter (ATA).

STEP 4 Using the Ethernet cable provided in the setup kit, connect your computer or laptop to an available LAN port at the back of the modem.

You may now connect the appropriate power adapters to the devices, starting by the DSL modem.

STEP 5

Please wait **2 minutes** for the modem to boot-up. If the setup was successful, the modem will present the following light status:

DSL MODEM LIGHTS	
LIGHTS	READ
Power	Solid Green
DSL	Solid Green
Internet	Solid Green
LAN 1-4	Flickers Green (if connected to a device)
USB	Off
WiFi (Button/LED)	Flickers Green
WPS (Button/LED)	Off

Analog Telephone Adapter (ATA) lights	
LIGHTS	READ
Power	Solid Green
Internet	Solid Green
Phone 1	Solid Green
Phone 2	Solid Green

**CONGRATULATIONS!
YOUR SETUP IS NOW COMPLETE.**
