Thank You for choosing Distributel

In order to ensure the smooth setup of your Distributel High Speed Cable Internet service, please follow the easy steps laid out in this guide.

The setup kit for your High Speed Cable service should contain the following items:

*Please note that the modem shown is for the purposes of illustrating the setup process and may differ from your device.

⚠ Before beginning the setup process, please ensure that all of your equipment is turned off.

STEP 1 Connect the coaxial cable* emerging from your cable outlet to the CABLE port located on the back of the modem.

*Coaxial cable should be supplied during installation. If you require a longer length of coaxial cable, these can be purchased at most home electronic stores.

STEP 2 Using the Ethernet cable provided in the setup kit, connect your computer or laptop to an available LAN port at the back of the modem.

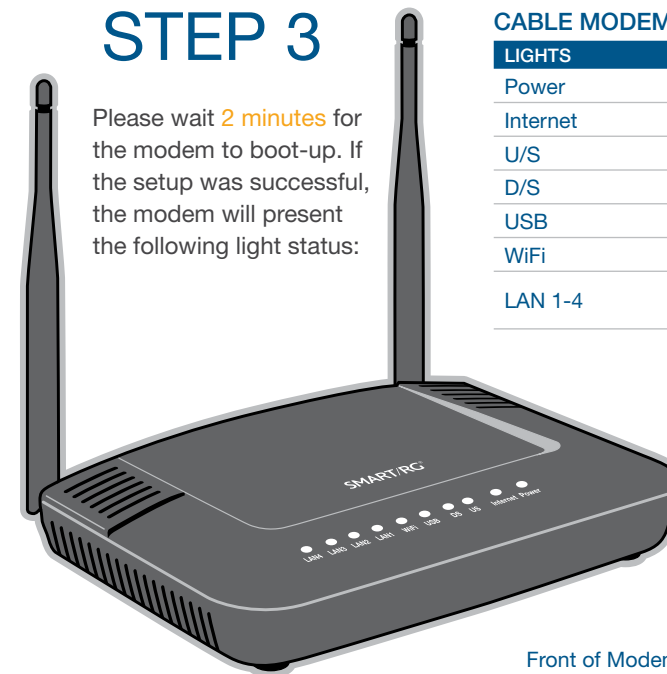

⚠ You may now connect the appropriate power adapters to the devices, starting by the Cable modem.

STEP 3

Please wait **2 minutes** for the modem to boot-up. If the setup was successful, the modem will present the following light status:

CABLE MODEM LIGHTS

LIGHTS	READ
Power	Solid Green
Internet	Solid Green
U/S	Solid Green
D/S	Solid Green
USB	Off
WiFi	Flickers Green
LAN 1-4	Flickers Green (if connected to a device)

CONGRATULATIONS! YOUR SETUP IS NOW COMPLETE.
