Thank You for choosing Distributel

In order to ensure the smooth setup of your Distributel High Speed Cable Internet service, please follow the easy steps laid out in this guide.

The setup kit for your High Speed Cable service should contain the following items:

! Before beginning the setup process, please ensure that all of your equipment is turned off.

STEP 1

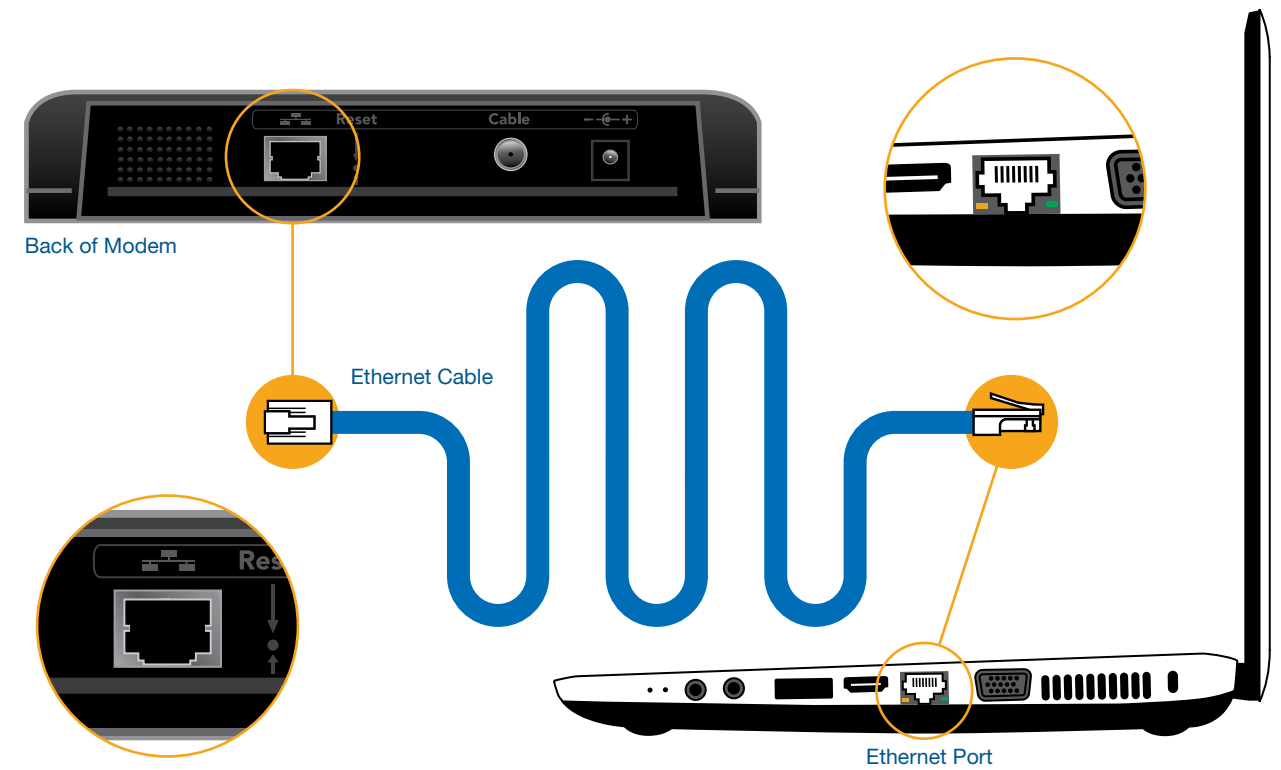

Connect the coaxial cable emerging from your cable outlet to the CABLE port located on the back of the modem.

! If you require a longer length of coaxial cable, this can be purchased at most home electronic stores.

STEP 2

Using the Ethernet cable provided, connect your laptop (or the Internet / WAN port of your router if you would like a network setup) to the modem's ETHERNET port.

! You may now turn all your devices back on.

STEP 3

Please wait for the modem to boot-up. The Thomson DCM475 or DCM476 must have solid POWER, DS, US and ONLINE green or blue lights displayed. The LINK light should be either solid or flashing. A flashing LINK light indicates data transferring. In the case of the Thomson DCM425, the INTERNET and CABLE LINK should have solid lights displayed. The PC LINK and CABLE ACTIVITY lights should be either solid or flashing; flashing lights indicates data transferring. If the lights do not behave as described, repeat steps 1 and 2.

DCM475/476 Modem Lights

LIGHTS	READ
Power	Solid
DS	Solid
US	Solid
Online	Solid
LINK	Solid or Flashing

DCM425 Modem Lights

LIGHTS	READ
Internet	Solid
PC Link	Solid or Flashing
Cable Link	Solid
Cable Activity	Solid or Flashing

CONGRATULATIONS! YOUR SETUP IS NOW COMPLETE.
